PROFESSIONAL SUMMARY

Computer Science student at Arab Open University with a current GPA of 3.43/4.00, foundational knowledge of programming, computer systems, technical troubleshooting, and artificial intelligence, and prior university study in medicine. Completed an AI training hackathon and built an original AI-powered student productivity project. Interested in artificial intelligence and AI agents, and seeking internship, trainee, or entry-level technical opportunities to develop practical experience and contribute to real work.

TECHNICAL SKILLS

Programming fundamentals | Algorithms and logical reasoning | Artificial intelligence fundamentals | AI agents and AI-assisted workflows | Windows installation and configuration | Technical troubleshooting | Software and hardware compatibility | Basic network diagnostics | Web-based project development | Problem solving | English communication

PROJECTS

Adnan OS: A Command Center for the Modern CS Student | AI Training Hackathon | July 2026

- Built and presented an original AI-powered working project designed to organise study, productivity, and technical-learning workflows for a Computer Science student.
- Recognised as an AI Showcase Featured Project by the training programme.

Personal Portfolio Website | Live Project

- Built and maintained a bilingual personal portfolio using AI coding agents, converting requirements into structured prompts, reviewing generated changes, testing functionality, and iterating on design and content.
- Used AI-assisted workflows to organise projects, improve usability, and maintain a professional online presence.

EDUCATION

Bachelor of Science in Computer Science and Artificial Intelligence | 2025 - Present

Arab Open University, Jeddah, Saudi Arabia | Current GPA: 3.43/4.00

- Relevant coursework: Introduction to Computing and IT, Foundations of Programming (OUbuild), and Introduction to Artificial Intelligence.

Previous Undergraduate Study in Human Medicine | 2023 - 2025

Faculty of Medicine, Ain Shams University, Egypt

- Attended approximately 1.5 years of undergraduate medical study before transitioning to Computer Science. Academic documentation confirms first-year enrollment; no degree or certificate was awarded.

CERTIFICATIONS AND TRAINING

- AI Training Hackathon and Workshop Completion - Kanz AI and LAU Academy of Continuing Education | July 2026
- Intensive English Language Programme - Oxford English Institute, Saudi Arabia | Level 8 Certificate | 2023
- Intensive Godot Engine Workshop - 3-day attendance certificate | 2025

TECHNICAL KNOWLEDGE

- Programming and computing: Basic programming logic, algorithms, visual programming frameworks, and introductory artificial intelligence concepts.
- Computer systems: Clean Windows installation, driver updates, background-process management, and workstation configuration.
- Troubleshooting: Basic diagnosis of software conflicts, hardware compatibility issues, and home-network connectivity using ping and latency checks.
